

System21[®]

COLOR CHAIN LINK FENCE

A Premium-Bonded System that is warranted against cracking, peeling, or splitting

The heart of your System21[®] is the FRAMEWORK... the POSTS and RAILS. The framework is made of high-tensile steel for extra strength. This steel framework is galvanized inside and outside with pure zinc for protection from rust, chemicals, and weathering.

The System21[®] Framework then enters a six stage chemical conversion preparing the surface for a special polyester powder. This powder coating is thermally bonded at 425 degrees farenheit to the fence posts and cross-rails, providing a truly superior long-life fence framework.

When looking for fence... TRUST System21[®]!

Extra Strong Bonded Framework

- A. Galvanized Inside
- B. Steel Framework
- C. Galvanized Outside
- D. Zinc Phosphate/Chromate Conversion Coating
- E. Bonded Polyester Powder Coating

System21[®]

COLOR CHAIN LINK FENCE

Combine the safety, security and value of chain-link with the durability and beauty of a maintenance-free poly-coated fence system.

COLOR CHAIN LINK FENCE

Enhance Your Install With COLOR!

Shown in Green with Eastern Hedge Inserts (Sold Separately)

Tennis Court Fencing (Shown in Brown)

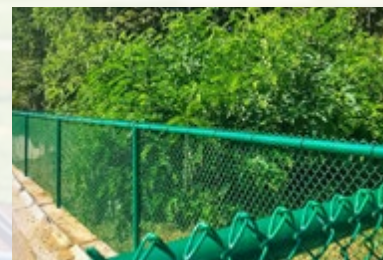

Matching Welded Driveway and Walk Gates

Non-Climbable Mesh Options

Security Features Available (Sold Separately)

Shown In Green

High-Security Heavy Gauges

There's always a System21[®] fence that's perfect for your installation!

Our exclusive coating process bonds a tough, resilient, and protective layer over extra heavy-gauge steel pipe, fittings, and wire. This gives the entire system an attractive finish with an extended durability that will last for many years.

The System21[®] Fence System is available in your choice of black, green, and brown.

Shown with Eastern Privacy Slats (Sold Separately)

For vibrant, durable boundaries, consider color chain-link!

An ideal choice for dog runs, school yards, and playgrounds. It also enhances sports courts and backyard pools. Secure commercial lots or define public parks and fields with a touch of both color and safety.
